## SUMMARY

Software Engineer with 1.5 years of experience building production-grade web and mobile applications across healthcare, e-commerce, CRM, and industrial domains. Skilled in React.js, React Native, Node.js, TypeScript, and Firebase, with expertise in scalable application development, secure payment integrations, and database optimization.

## EXPERIENCE

### Software Engineer

Jul 2025 – Present

*ReactorBee Private Limited (Remote)*

**Tech Stack:** React.js, React Native, TypeScript, JavaScript, Node.js, Java, Firebase, Firestore, Cloud Functions, PostgreSQL, REST APIs

- Designed, developed, and maintained production-grade web and cross-platform applications across healthcare, e-commerce, CRM, and industrial domains using modern full-stack technologies.
- Owned the end-to-end development of business-critical features, including frontend architecture, backend services, database design, authentication, payment gateway integrations, and production deployments.
- Designed scalable Firestore data models, implemented security rules and Cloud Functions, and optimized query strategies to build secure, reliable, and high-performance applications.
- Integrated Razorpay, Cashfree, Shiprocket, Google APIs, and email services using REST APIs.
- Improved application performance and reliability by implementing query optimization, pagination, batched writes, caching strategies, retry mechanisms, and reusable component architectures.
- Developed responsive, SEO-friendly, and accessible web interfaces using React.js, ensuring cross-browser compatibility and a consistent user experience.
- Collaborated with product managers, designers, and engineers to deliver production-ready features while participating in feature planning, debugging, testing, and release cycles.

### Software Engineer Intern

Jan 2025 – Jul 2025

*ReactorBee Private Limited (Remote)*

**Tech Stack:** React.js, TypeScript, JavaScript, Tailwind CSS, Liferay DXP, PostgreSQL, Firebase

- Developed custom Liferay DXP modules, Site Initializers, and Client Extensions to automate site creation and standardize pages, themes, and content.
- Built backend business logic using Liferay Service Builder with PostgreSQL and developed reusable fragments, FreeMarker templates, and frontend components.
- Built enterprise web portals using reusable fragments, collections, master pages, and structured content with Liferay Objects and Structures.
- Contributed to enterprise projects, including a government digital platform, through feature development, debugging, testing, and deployments.

## PROJECTS

### *Mandali Deals | Group Buying E-Commerce Platform*

**Tech Stack:** React Native, React.js, Node.js, TypeScript, Firebase, Firestore, Cloud Functions, Razorpay, Shiprocket API

- Developed a group-buying e-commerce platform where customers join campaigns to unlock volume-based discounts before completing final purchases.
- Designed a two-phase payment workflow for token payments and final balance settlements based on campaign outcomes.
- Implemented Firestore transaction-based inventory allocation to prevent stock overselling across product variants.
- Built dynamic pricing logic that recalculates product pricing based on campaign progress and participant count.
- Integrated Razorpay with secure webhook-based payment verification and order state management.
- Integrated Shiprocket APIs with token caching, retry mechanisms, and exponential backoff for logistics.
- Optimized Firestore queries using cursor-based pagination for scalable campaign and product listings.

### *PhysioKia | Cross-Platform Healthcare Management Platform*

**Tech Stack:** React.js, React Native (Expo), Firebase Authentication, Firestore, CryptoJS, Tailwind CSS

- Architected a cross-platform application for secure patient management, appointment scheduling, billing, and reporting.
- Engineered client-side AES-256 encryption using CryptoJS to protect sensitive patient data before storing it in Firestore.
- Developed a recurring appointment engine supporting conflict detection and Firestore batched writes.
- Designed a hybrid notification system to overcome JavaScript timer limitations for reliable reminder scheduling.
- Built real-time dashboards using Firestore for appointment tracking, patient analytics, and revenue monitoring.
- Implemented role-based access control (RBAC) with Firebase Authentication to manage secure access for physiotherapists, reception staff, and administrators across web and mobile applications.

TECHNICAL SKILLS

**Programming Languages:** JavaScript (ES6+), TypeScript, Java  
**Frontend:** React.js, React Native (Expo), HTML5, CSS3, Tailwind CSS, Redux Toolkit, Framer Motion, Vite  
**Backend:** Node.js, Express.js, Firebase Cloud Functions, REST APIs, WebSockets  
**Databases:** Firebase Firestore, PostgreSQL, MongoDB, MySQL, Redis  
**Enterprise Development:** Liferay DXP, Service Builder, Site Initializers, Client Extensions, FreeMarker  
**Cloud & DevOps:** Docker, Kubernetes, Firebase Hosting, Firebase Authentication, CI/CD  
**Tools:** Git, GitHub, Cursor, VS Code, IntelliJ IDEA  
**Core Expertise:** Firestore Data Modeling, Authentication & Authorization, Payment Gateway Integration, REST API Integration, Performance Optimization, Responsive UI Development
